INSTALLATION
in “tempered glass”
INSTRUCTION
WORKBOOK

facebook.com/SGBD Stained Glass by Design

Recommended guidelines for installation of Stained Glass artwork as created by SGBD Stained Glass by Design: Installation of stained glass encased between 2 pieces of tempered plate glass.

Stained glass artwork is complete and delivered to Manufacturer for encasement between 2 pieces of tempered glass and sealed to protect from the weather.

The existing window is removed.

Denatured Alcohol is used to clean the surface edges.

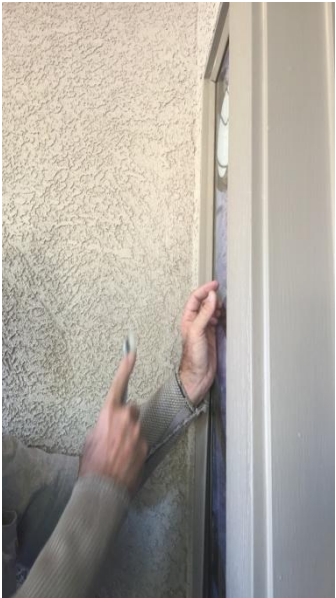

The tempered glass encased window is fitted into the opening.

Rubber stops are placed to ensure plumb and alignment is square. Silicone caulking is installed to ensure weather seal.

Rubber seal stops are placed around perimeter of window.

Installation is complete and window can be cleaned with any glass/ window cleaning product.
